

TACTICAL LONG RANGE HF WIRE ANTENNA **LONGSHOT™**

MILITARY ANTENNA SOLUTIONS

C&S Antennas manufactures HF wire antennas for short, medium and long range communications. The antennas are designed for tactical, emergency and fast-reaction situations.

The **LONGSHOT™** is a lightweight, transportable HF wire antenna intended primarily for long-range skywave communications.

Supplied in a rapidly assembled kit form, the antenna may be erected in a variety of long wire configurations (including a low profile, jam-resistant mode) to meet contingency.

The **LONGSHOT™** has a 500 Foot Sloping Vee – Long-Range, Transmit/ Receive.

LONGSHOT™ - TACTICAL LONG-RANGE HF WIRE ANTENNA

Wires are Kevlar cored, copper braided and pvc coated with a no-kink feature. They are numbered for accurate set-up and are designed for the military environment with the soldier in mind.
